

## NOMADEEC BRINGS HOOLENS BREAKTHROUGH TELEMEDICINE TECHNOLOGY TO CES 2018 IN COLLABORATION WITH HOLOFORGE

*Nomadeec to host live demonstrations with trained medical professionals of its new mixed reality and mobile telemedicine platform technology for healthcare practitioners at CES 2018.*

**Bordeaux, France, December 12, 2017** – [Exelus](#), a leader in the development of telemedicine solutions, is proud to announce that it will showcase its groundbreaking telemedicine platform using innovative HoloLens technology in Las Vegas at CES 2018, from January 9 to January 12. The mixed reality telemedicine application was co-designed and co-developed in partnership with holographic expert Holoforge to support Exelus' revolutionary mobile platform [Nomadeec](#) which empowers field practitioners and reveals the future of telemedicine. Nomadeec is an integrated and reliable solution that provides healthcare professionals with exceptional capabilities, allowing them to focus on what matters: saving lives. At CES, Nomadeec will offer real life situation demos, providing insights into how in field practitioners can apply mixed reality to patient management.

For the first time in the world, EMTs and paramedics can seamlessly respond hands free to incidents thanks to the Microsoft HoloLens, with the ability to diagnose and respond remotely. Watch [Nomadeec CES trailer “Future of Telemedicine”](#) below for a visual illustration of Nomadeec's augmented reality capabilities.

[NOMADEEC VIDEO - #FUTURETELEMEDICINE](#)

Nomadeec is a comprehensive mobile diagnostic and telemedicine platform focused on delivering the most accurate information as fast as possible. With a vast range of customizable assessment modules, the responder is quickly able to deliver exhaustive and accurate onsite triage. In field practitioners also have the ability to consult with physicians in real time making sure that a streamlined experience is provided from the moment the patient is cared for, until the time the patient arrives at the hospital. Nomadeec is compatible with a wide array of wireless diagnostic devices and can support up to 10+ connected bluetooth devices at a time

### NOMADEEC KEY FEATURES

- **CUSTOMIZABLE**

The Nomadeec Mobile and web App offer a large range of customizable modules allowing to set up a comprehensive patient assessment or clinical exam.

- **COMPATIBLE**

Nomadeec is compatible with all Android, Apple and Windows tablets and smartphones. Connectivity with 10+ wireless Bluetooth professional medical devices from manufacturers approved by leading health care professionals.

- **CONNECTED**

Nomadeec is easily Interoperable with an API that supports most Medical Software. Intuitive mobile App featuring version suitable for different Primary Care profiles. Mobile connectivity (WIFI, 3G/4G, Satellite) for tele-transmission and tele-consultation. A Robust 100% secure platform, meeting regulation standards for personal health data storage.

Explore the **future of telemedicine** with the team from **Nomadeec at CES 2018** in the Health & Wellness market place, located at Sands Expo, Tech West, Level 2, Halls A-D Venetian **Booth # 43852**. ### **About Exelus**

Exelus is the European leader in emergency telemedicine generating new ways to streamline mobile patient care. Its innovative technology platform Nomadeec was created by an emergency physician and a UX expert engineer, to provide medical technologies and services that are shaping a new age of patient care. We leverage new technologies and telemedicine, in collaboration with healthcare leaders, to develop a successful shift to sustainable healthcare systems.

### **About NOMADEEC**

The first emergency telemedicine platform for nursing homes and out-of-hospital care facilities. Comprehensive, reliable, high-performance and integrated, Nomadeec is the ideal solution for seamless communication between on-duty staff (nurses, care assistants, night watchmen, etc.) and medical care coordination services in an emergency and distant-care context.
